

GetSwift & OrdersIn Integration Quick Start Guide

GetSwift can integrate with [OrdersIn](#) so that any delivery order placed will create a delivery job in GetSwift. This integration can be set up via your settings in OrdersIn:

- 1) You'll need some information from GetSwift to start. Navigate to your merchant accounts integration page (<https://app.getswift.co/Merchant/APISettings>) and Generate an API Key. Also - make sure you select 'API Key Active' and press Update and the bottom of the page.
