

GetSwift & GloriaFood Integration

Quick Start Guide for Single Restaurants

Step 1: Setup in GloriaFoods

1. This guide applies if you have 1 restaurant on GloriaFood. If you have 2+ restaurants, please read the Multiple Restaurants quick start guide.
2. Navigate to <https://www.gloriafood.com/> and login to your account
3. Navigate to “Other” -> “Enabled integrations” (you can also click here <https://www.sistemadelivery.com/admin/app/other/integrations/list/index>)
4. Click “Enable custom integration” and enter into the “Endpoint URL” field: <https://app.getswift.co/api/v2/Integrations/GloriaFood/Jobs>
5. Click “Generate” to create a server key
6. Click the orange “Enable” button in the top right corner

GetSwift & GloriaFood Integration

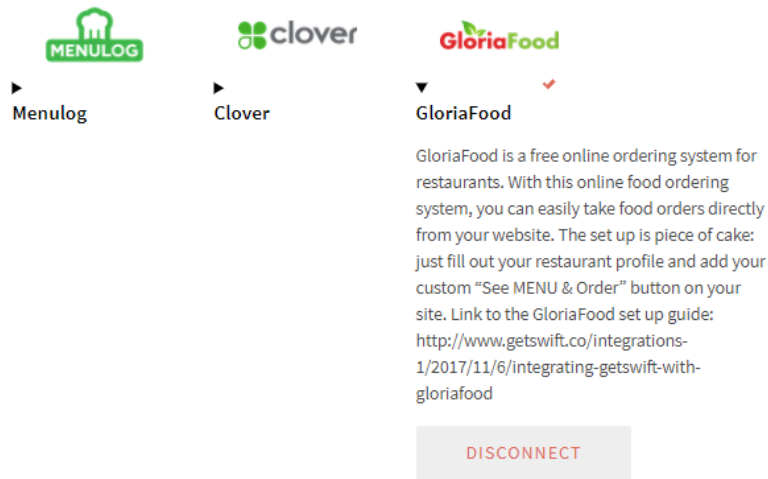

Quick Start Guide for Single Restaurants

Step 2: Setup in GetSwift

1. Navigate to <https://app.getswift.co/Merchant/ThirdParty> and click “Connect” under the GloriaFood. If you do not see the GloriaFood option on the page, please contact us through the live chat for additional help.

2. Click the black arrow to expand the “Settings”.
3. Find the 2 keys you copied in Step 1.6. Enter the “Restaurant Key”. For the “Authorize key” field, enter the “Server Key”.
4. Click “Update”
